

Recognizing Corporate Social Responsibility

Established in 1940, ATAGO has continuously made strides in the research and development of a wide variety of optoelectronic products, specifically focusing on refractometers. ATAGO directly controls the entire production process - designing, developing, assembling, and shipping. Our products are used in a variety of industries; from food and beverage processing, to petrochemicals and metalworking. ATAGO has an established reputation as a trusted brand and enjoys the fullest confidence of end-users, not only in Japan but also in 154 countries worldwide. Our continuing global expansion includes the opening of ATAGO U.S.A. in Bellevue, WA in July 2002 to oversee the operations in North and Latin America. ATAGO INDIA Instruments Pvt. Ltd. in Mumbai, India was established as a sales office in February 2005, followed by ATAGO (THAILAND) Co., LTD in December 2009. ATAGO BRASIL Ltda. made a start in February 2010 to better serve the growing sugar industry in Brazil. The two most recent developments are the openings of ATAGO ITALIA s.r.l. in October of 2010 and ATAGO CHINA Guangzhou Co., Ltd. in March of 2011. While we have long enjoyed market presence domestically in Japan, our service to the global market is becoming increasingly important.

As a result, ATAGO is fully aware of our corporate responsibility as a member of the global community, and we seek to make a positive impact both locally and internationally.

Below is the history of ATAGO's charitable assistance to those who have been victims of natural disasters.

November	2004	Earthquake in Chuetsu, Niigata
September	2005	Hurricane Katrina in New Orleans
October	2005	Earthquake in Pakistan
June	2006	Earthquake in Central Java
April	2007	Earthquake in Noto Peninsula
July	2007	Earthquake in the coast of Chuetsu, Niigata
December	2007	Earthquake in Peru
May	2008	Earthquake in Sichuan
May	2008	Cyclone Nargis in Myanmar
June	2008	Earthquake in Iwate/Miyagi Inland
April	2009	Earthquake in Abruzzo
January	2010	Earthquake in Haiti
February	2010	Earthquake in Chile
August	2010	Flood in Pakistan
March	2011	Earthquake in New Zealand

As new regulations and requirements are imposed in the marketplace, the competition is expected to become fiercer. Being true to our mission statement: "Create and Advance in Consonance," ATAGO is devoted to making strides in the research and development of scientific instruments to meet the ever-changing demands of our clientele.

Standard & Poor's Rating

ATAGO has received the top grade "aaa" from Japan SME (Small & Medium Sized Enterprise) Rating in 2007 and 2008.

This grade is presented by Standard & Poor's, a well-known provider of independent credit ratings.

Excellence in Tax Declaration

In November 2007, ATAGO received recognition of excellence from the Itabashi revenue office for the tax honesty, stable profitability, and transparent business model in 2002 and 2007.

Tokyo Trial Purchase Program

The "MASTER" hand-held refractometer series was selected by the Tokyo Trial Purchase Program 2009. Through this program, Tokyo Metropolis experimentally purchases reputable and cutting-edge products and provides marketing support to the local small and mid-size manufacturers.

Presence of Those Who Have Reached the Summit

Digital Refractometers

RX-α series

The World's Highest Standard of Technology
Stemming from Over Half a Century of Expertise

A Wide Selection to Meet Every Measurement Need

Most Accurate and Full Range
RX-5000X-Plus

The **world's highest level of accuracy**
Brix: $\pm 0.010\%$, Refractive Index: ± 0.00002
Brix value displayed to the 3rd decimal place

Hygienic Flat Sample Stage
RX-5000X-Bev

Developed with the **beverage** industry in mind
Easy-to-clean **flat** sample stage
Quickly measure a sample after another

Wide Range and High Temperature
RX-7000X

Ideal for high Refractive Index samples
- Fragrances, organic solvents, etc.
A **wide** Refractive Index range: 1.3250-1.7000 with
Automatic Temperature Compensation up to 70°C

Wide Range, High Temperature, and Accuracy
RX-9000X

Equipped with the accuracy of the RX-5000 α
combined with **the wide Refractive Index** range
and **temperature control** of the RX-7000 α for a
wide variety of applications

World's No.1 Accuracy
RX-0070X

For low viscosity samples less than 5% Brix
World's highest accuracy $\pm 0.005\%$ Brix
Manage the concentrations of low-Brix industrial
solutions - Surfactants, anti-rust coatings, heavy
water, liquid glass, etc.
Refractive Index Scale is also included

Beautiful, Functional Design. User-Tested Ease of Use.
True Quality Never Becomes Obsolete. It Only Gets Better with Time.

World's Highest Standard of Accuracy

The RX series are the most accurate of ATAGO refractometers
programmed with a trusted and advanced algorithm.
The epitome of which boasts the accuracy of ± 0.000010 nD
and $\pm 0.005\%$ Brix.

Ergonomically Designed Layout

The RX- α series was designed with ease of use in mind.
Extensive research was performed in the design phase to
ensure an ergonomic interface that made operation easy
while maximizing efficiency.

Cover Plate

Used to prevent interference from external
light and ambient temperature during
measurements. There is **no need to clean**
the cover plate as it does not come in contact
with the sample.

Easy-to-Clean Sample Stage

The **new no-ridge design** makes
cleaning even easier.

Fast
and
Easy

RX-5000X

Measurement Principles

Refractometry is based on the
principle that as the density of a
substance increases, its Refractive
Index rises proportionately.

Rugged Metal Body

The sturdy, yet elegant die-cast metal
body protects the optical system. A
special coating on the surface adds
extra durability against chemicals.

Simple Operation

General operations can be performed with
only two buttons - ultimate usability.

No-Fuss Zero-Setting

Simply place distilled water on the prism, and press the
ZERO button. Once the temperature has stabilized,
zero-setting is completed within a few seconds.
No complicated operations are involved.

One
Touch
Zero Set

Printer Connectivity

GLP/GMP compliant - sample numbers, dates, time,
settings, temperatures, and sample names - can be
printed. Print items can be selected for customized
reporting. **Thermal dot** or **impact dot printer** models
available (see Accessories on page 9).

Computer Connectivity

Transmit data to a PC via RS-232C or USB. (USB
connection requires a USB to RS-232C adaptor.) Data
transmission software is also available for **direct data
output to Excel** (see Accessories on page 9).

Visual "Pass/Fail" Indication

Quickly identify if the measurement value is within the
target range with the **graphic display**. Up to 30 sample
types can be programmed to improve inspection
efficiency.

Measurement History

The built-in memory will instantly recall the last 30
measurement values.

Programmable User Scale

Enter 3 data points of a scale, other than Brix, to directly
display the concentration of specific solutions, such as
alcohol, salinity, DMF, and more. Save time and
increase efficiency by eliminating the need to refer to
manual conversion tables.

Password Security

The password feature allows only authorized personnel
to perform certain operations. Assign a system level and
password to limit each operator's activities.

When using multiple units...

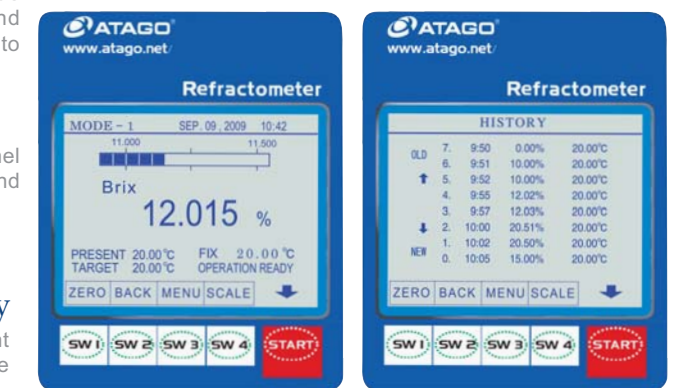

Resolve Measurement Value Discrepancy

With the **manual calibration** feature, measurement
values can be adjusted to be consistent with multiple
units.

Count	Temp	Refractive Index	Brix	Over	SALT	Over	Temp
1	16.0222	70116	1558	nD			20
2	16.0231	70116	1558	OUT	OF	WATER	
3	16.0248	70116	1558	nD	1.2333	Brix	0
4	16.0307	70116	1558	ZERO	SET	END	
5	16.0314	70116	1558	ZERO	SET	END	
6	16.0320	70116	1559	nD	1.2333	Brix	0
7	16.0501	70116	1559	nD	1.2333	Brix	0
8	16.0509	70116	1562	ZERO	SET	END	
9	16.0515	70116	1561	nD	1.2333	Brix	0
10	16.0520	70116	1561	nD	1.2333	Brix	0
11	16.0505	70116	1561	nD	1.2333	Brix	0

Measurement history

3 Measurement Modes

MODE-1 Accuracy-focused

The Internal Peltier Thermo-Module
heats or cools the sample to the set
target temperature before the
measurement begins.

Reliability

The new and advanced **algorithm**
allows for more stable readings every
time.

Large LCD

Large and easy to read 320x240
backlit LCD makes measurements
easy to read.

Sturdy Sheet Switch

The durable Switch Sheet not only
shields the LCD panel but also protects
the operation buttons. Button operation
helps **minimize operator error** and
replacement costs when needed.

Wide Ambient Temperature Range

The ambient temperature range of 5
up to 60°C allows measurements in a
wide range of temperature conditions.

MODE-2 Speed-focused

The Internal Peltier Thermo-Module
heats or cools the sample and starts
collecting data to estimate the
measurement value at the target
temperature.

Speedy Measurement Results

Once the sample temperature has
stabilized, measurement takes only a
few seconds. Results are displayed
instantly with excellent repeatability.

Full Selection of Accessories

See Accessories on page 9.

MODE-3 No.Temp Compensation

Choose whether or not to activate the
Internal Peltier Thermo-Module. The
measurement value is displayed within
8 seconds, or after a specified wait time.

Acid and Alkaline Resistance

Specialized models for the
measurement of **high alkaline or acidic
samples** can be custom-made. Please
contact ATAGO.

Calibration Certificate

A calibration certificate can be ordered
with each instrument for an additional
charge. Please contact your ATAGO
representative for further details.

Dependable Optical System

End User Feedback

Inspection : Vegetable oil manufacturer

The Refractive Index of vegetable oil is listed in JAS (Japan Agricultural Standard) and therefore is an important value to check within quality control. We switched from an Abbe refractometer to the RX-7000 α after we evaluated a demo unit to check the consistency of the readings. We were very satisfied with the speed and performance of the instrument, and the quality of the customer service. **We are also happy to know that loaner units are available free of charge when our instrument is out for regular maintenance.**

QC : Pharmaceutical manufacturer

We are using the RX-5000 α to check the concentration of solutions. Compared to other analytical machines, the features that appeal to us are: only a small amount of sample is required, a measurement value is displayed quickly, and no sample preparation prior to measurement is required. **We appreciate ATAGO's customer support when we have samples that are difficult to measure or receive unexpected measurement results.**

R&D : Beverage manufacturer

We have been using ATAGO products for over a decade. We currently use a RX-007 α for unsweetened drinks, such as green and red teas, and three RX-5000 α for regular drinks. It gives us peace of mind knowing that all ATAGO instruments are manufactured by the same company. More and more customers choose beverages based on the calories and ingredients. Brix measurements play an essential role in our product development.

Testing : Food manufacturer

Recently, with food safety issues becoming a focus of attention, we as manufacturers are required to adhere to stricter quality control standards by implementing such standards as HACCP and ISO22000. **We are using the RX-5000 α as the high accuracy master unit for inspections of our final products.** We always appreciate the quick and courteous customer service when we need to request a loaner unit during maintenance or when purchasing a new replacement unit.

Condiments and Vegetable Juice Inspection Association

We perform JAS (Japan Agricultural Standard) authorized inspections of tomato products, sauces, vinegars, carrot juice, and other juices that contain carrot juice. Food manufacturers from all over the country send us samples of their products for testing. In these times, where food safety is critical, the RX-5000 α acts as a **trustworthy intermediary between food manufacturers and customers.** We are very satisfied with the unit's simple operation without having to compromise on accuracy.

ATAGO RX- α series are also used at laboratories of the following food testing associations:

- Food Environment Inspection Association
- Japan Juice Association Corporation
- Japan Oil and Fat Inspection Association

Why Choose ATAGO?

1 Proud Heritage and Experience

ATAGO has 70 years of experience in optical instrument manufacturing. With our expertise cultivated over decades, as well as an extensive selection of instruments, we can meet a variety of measurement needs including highly specialized industries.

2 Industry-Leading Technology

Refraction of light has been our sole specialty throughout the existence of ATAGO, and we strive for perfection in optical systems. We listen to end-user feedback from 154 countries and continuously push the limit of refractometry.

3 Trusted Product Support

We dedicate ourselves on the high durability and low failure rate of ATAGO products. Our repair service is carried out in a timely manner. Calibration certificates are available.

Application Examples

Measurement Method

The RX- α series is designed for extremely easy and simple uses. Instruments can be operated with only two buttons - the ZERO key for zero-setting, and the START key for measurements. Simple operation without compromising the accuracy level.

Place a sample on the prism.

Press the START key to start a measurement.

Wipe off the sample to clean.

The RX- α series are high quality and highly accurate automatic digital refractometers with an Internal Peltier Thermo-Module to control the sample temperature. Applications can be classified into the following three categories.

1. Refractive Index

Refractive Index is a common quality standard measure for pharmaceutical or chemical products. Measurements need to be taken at a constant temperature, commonly 20°C, 25°C, and 40°C. The RX- α units are equipped with the internal Peltier Thermo-Module, and measurement starts once the target temperature is reached.

Fragrance and Food Additives

Fragrance and food additives are required to have certain Refractive Index. It is also used to identify unknown fragrances.

Pharmaceutical Products

Some pharmacies utilize Refractive Index standards. The Refractive Index of pharmaceutical products is measured for quality assurance purposes. Refractive Index of intravenous medications is also measured to control the concentration.

Cosmetics

The Refractive Index of petroleum and other base ingredients for cosmetics are measured for quality control. The Refractive Index of some components affects the cosmetics' ability to make the skin shine, so refractive index measurements are commonly performed.

Petroleum and Organic Solutions

Standards are set for the Refractive Index of some refined petroleum products and organic chemicals.

Oils and Fats

The Refractive Index of unprocessed plant oil is regulated by many governmental standards. Refractive Index measurements are crucial for quality assurance of animal-based oils as well.

Detergents

The amount of impurities contained in hydrocarbon-based detergents can be calculated by the Refractive Index. The Refractive Index of glycol ether-based and water-based detergents is also measured.

Measurement value screen

Printed measurement example

Free Demonstration Units Available. Please contact ATAGO Customer Service.
www.atago.net

2. Brix

Brix is measured for quality control purposes in the food and beverage industries. The RX- α units are widely used for fruit juice, condiments, jams, and honey. The RX-007 α (minimum indication 0.001% Brix) is used for tea and unsweetened drinks.

Beverages and Fruit Juice

The Brix of dairy, fruit and soft drinks, and natural fruit juice is tested throughout the production process for quality control. The RX-5000 α -Plus is ideal for measurements that require a high accuracy level are often required. The RX-007 α is a specialized model for tea and unsweetened drinks.

Jams, Honey, Liquid Sugar, Syrups

The measurements to determine the sugar content are absolutely essential, and refractometers are commonly used. The RX- α series are ideal for measuring viscous samples.

Condiments, Sauces, Soups

Refractometers are used to control the concentration of ketchup, sauces, and soups. The RX- α series provide precise measurements for these types of samples.

3. Concentration

The concentrations of industrial solutions are often monitored. Examples include water-based cutting oils and cleaning solutions, hydrogen peroxide, coolants, and alcohol solutions. Although the Brix scale is commonly used, user scales can also be programmed to display converted sample values.

Chemical Solutions

Refractometers can quickly measure the concentrations of hydrogen peroxide, caustic soda solutions, ethyl alcohol, and dimethylformamide solutions.

Cutting Oil and Quenching Oil

The concentrations of water-based cutting oils and quenching oils are regulated according to the purpose. Oils that are not at the correct concentrations negatively affect the quality of the finished products and the lifetime of the machining tools.

Antifreeze and Coolants

The concentration of automotive coolants and coolants used in freezers and pipes of central air conditioning systems need to be checked for the concentration to determine the freezing point.

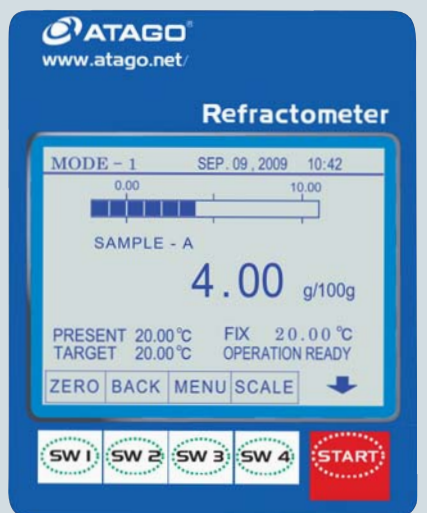

User scales enable direct display of concentrations and specific gravity of various solutions. Simply program 3 data points of corresponding Refractive Index and concentration or specific gravity to automatically create a scale.

Measurement value screen

Measurement value screen

Printed measurement example

ATAGO products comply with HACCP, GMP, and GLP systems standards.

Application Trivia:

[Eye drop] Tocopherol: RI 1.503-1.507
One drop dispensed from a bottle is approximately 0.05ml, of which 0.02ml actually stays in the eye. The most effective way of administering is to keep the eye closed for about two minutes after eye drop is applied.

[Facial masks] Glycerin: RI 1.4740
Cream forms a moisturizing membrane for the skin. Ingredients vary from mud, seaweed, oils, cucumber, bran, aloe, lemon, sake lees, honey, molasses, flour, and even bush warblers' droppings.

[Soap] Soap: Brix 24.12%
Soap may have been first discovered when ancient people noticed that their hands were cleaner when washed with a mixture of wood ashes and fats of animals.

[Japanese beef bowl] Sauce: Brix 13.7%
The custom of eating beef was introduced to Japanese by the influx of Western culture after the war. The dish used to be called "kamechabu." It originates from a rice bowl on which the broth from a beef stew was poured about 137 years ago.

[Japanese tempura bowl] Sauce: Brix 23.4%
After World War II, then Supreme Allied Commander was served tempura. Since then, tempura is a well-known and popular Japanese dish worldwide. The cooking technique may have been introduced by Chinese in the Tang Dynasty era in about 8th century.

[Ramen] Soup: Brix 4.6%
Noodles of Chinese origin, ramen have become a Japanese cultural icon. It is characterized by the wavy noodles and soy sauce-based soup.

[Éclair] Chocolate: Brix 77.5%
The name means "lightning" in French because either the cracks on the pastry surface resemble lightning, or it is consumed at lightning speed. The Brix of the chocolate ganache is measured.

[Anit-itch Medications] Diphenhydramine: RI approx. 1.55
Itching of skin is associated with insect bites and stings, hives, allergic reactions, eczema, contact dermatitis, fungal, etc.

[Nail polish] Acetone: RI 1.3590
In Japan, safflower and rose balsam were commonly used to paint nails in old times. Colored nail enamels were introduced around 1930, inspired by fast-drying automobile paints.

[Dishwashing detergent] Detergent: Brix 33.26%
Recently, detergents are developed to be not only tough on grease but also gentle and moisturizing for the skin. Most dishwashing detergents are neutral and contain plant-based ingredients, such as corn oil, coconut oil, palm oil, sunflower oil, etc.

[Seafood salad] Asian salad dressing: Brix 12.0%
This healthy salad is a mixture of seafood, such as octopus, shrimp, clams, and vegetables. A great source of vitamins.

[Caesar salad] Caesar vinaigrette: Brix 21.2%
An Italian-born Mexican chef, Cesar Cardini created this classic salad at his hotel restaurant in Tijuana.

[Shark fin soup] Soup: Brix 5.1%
Japan is a supplier of shark fin. Shark fin, along with sea cucumbers and abalones, were exported to China in 1600's.

[Mitarashi dango] Sauce: Brix 48.7%
Mitarashi dango is a Japanese dumpling made from rice flour. 3-5 pieces are skewered, charcoal-grilled, and covered with syrup made from soy sauce, sugar, and starch. It was originally served as an offering to gods at shrine festivals in the city of Kyoto.

Common features	Measurement system : Optical-refraction critical-angle detection system	Power supply : AC100V to 240V
	Light source : LED	Power consumption : 50/60Hz, 65VA
	Materials : Sample stage - SUS 316 Prism - Artificial sapphire (RX-007 α utilizes high density optical glass)	Environmental operating conditions : Temperature 5 to 40°C; Altitude 2,000m above sea level

Accessories

MAGIC™

Used for measuring volatile substances. Choose either metal or resin.

[RE-56180] MAGIC™ (Metal)
[RE-56185] MAGIC™ (Resin)

Printer

Digital Printer DP-RX

Cat.No. 3121 DP-RX

For printing on thermal paper.

Printing method : Thermal dot
Power supply : AC adaptor (AC100V)
Power consumption : 13VA
Dimensions & weight : 17×16×7cm, 580g (main unit only)

Data Transmission Software

Cat.No. 3127 PC data transmission software

Measurement results of the RX- α series can be transferred to Microsoft® Excel.

NEW!!

Software compliant with 21 CFR Part 11 coming soon!

Fan Filter Replacement

Regular cleaning of the fan filter is highly recommended to maintain the optimum performance level of the RX- α series.

[RE-58001] Fan filter replacement (a set of 12)

Funnel-type Flow Cell

Save time with the flow cell! No need to clean the prism between measurements.

[RE-56172] RX-5000 α , -5000 α -Plus
[RE-56173] RX-7000 α , -9000 α

Digital Printer DP-RD

Cat.No. 3122 DP-RD

For printing on regular paper.

Printing method : Dot impact
Power supply : AC adaptor (AC100V)
Power consumption : 7VA
Dimensions & weight : 11×18×9cm, 470g (main unit only)

Sucrose Solution (calibration certificate optional)

Regular inspection of the RX- α unit is highly recommended. Use one of the following solutions to confirm the calibration.

- [RE-111001] 10% sucrose solution ($\pm 0.01\%$)
 - [RE-112001] 20% sucrose solution ($\pm 0.01\%$)
 - [RE-113001] 30% sucrose solution ($\pm 0.01\%$)
 - [RE-114002] 40% sucrose solution ($\pm 0.02\%$)
 - [RE-115002] 50% sucrose solution ($\pm 0.02\%$)
- Shelf life is 10 days.

Key Cover

Prevent accidental system changes by covering all but the START and ZERO keys.

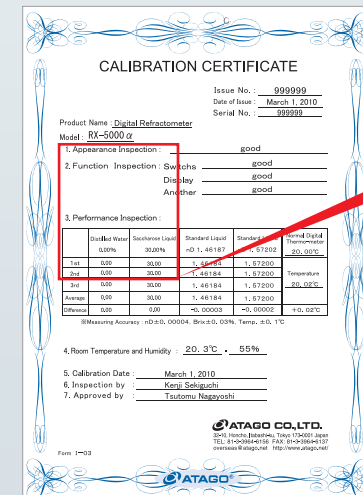

[RE-58120] Key cover

For the utmost in customer satisfaction...

ATAGO offers calibration service in conformance with ISO quality management systems as well as HACCP, GMP and other standards. The following three documents will be issued. (Calibration service is performed at an additional cost.)
